V Fleet

Location Services | Analysis | Search Vehicle | Geofence | Notifications

Location Services

Display information of vehicle location, personnel location, parking distribution hint, vehicle tracking, vehicle files, traffic record, vehicle condition and other related information in real-time.

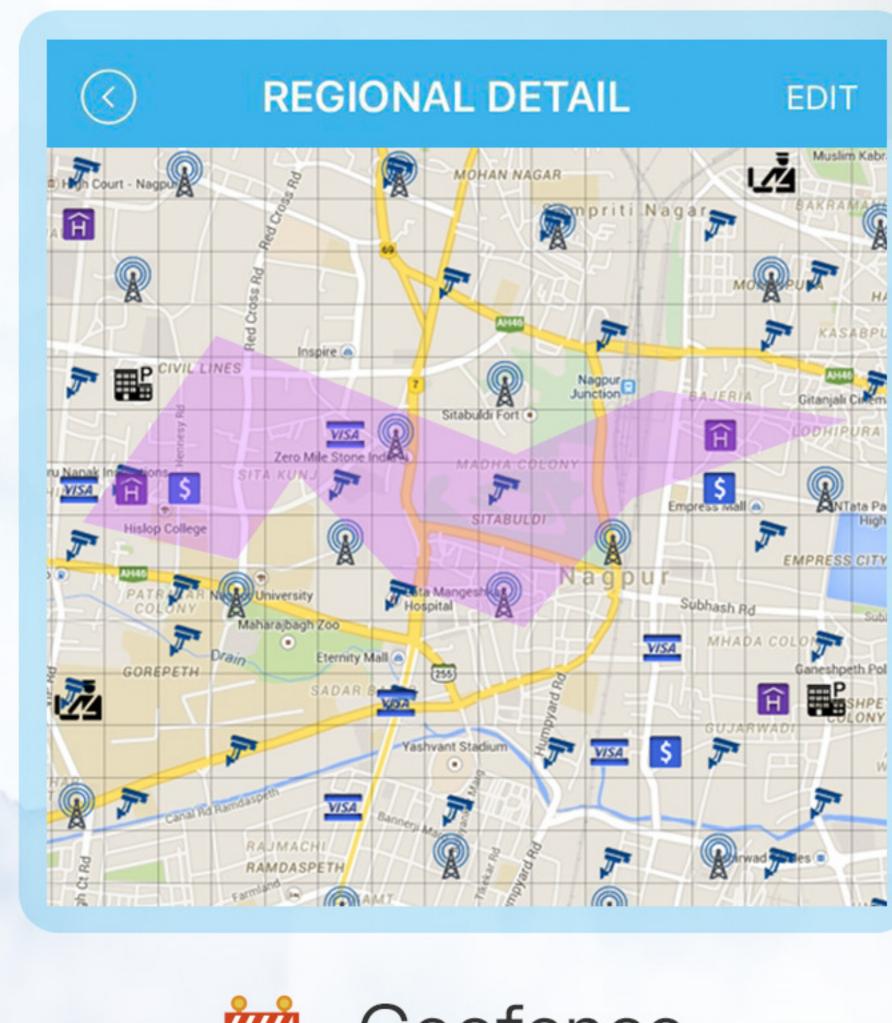

Analysis

The vehicle data such as mileage, user time, fuel consumption, idle speed and cross-border speed are shown.
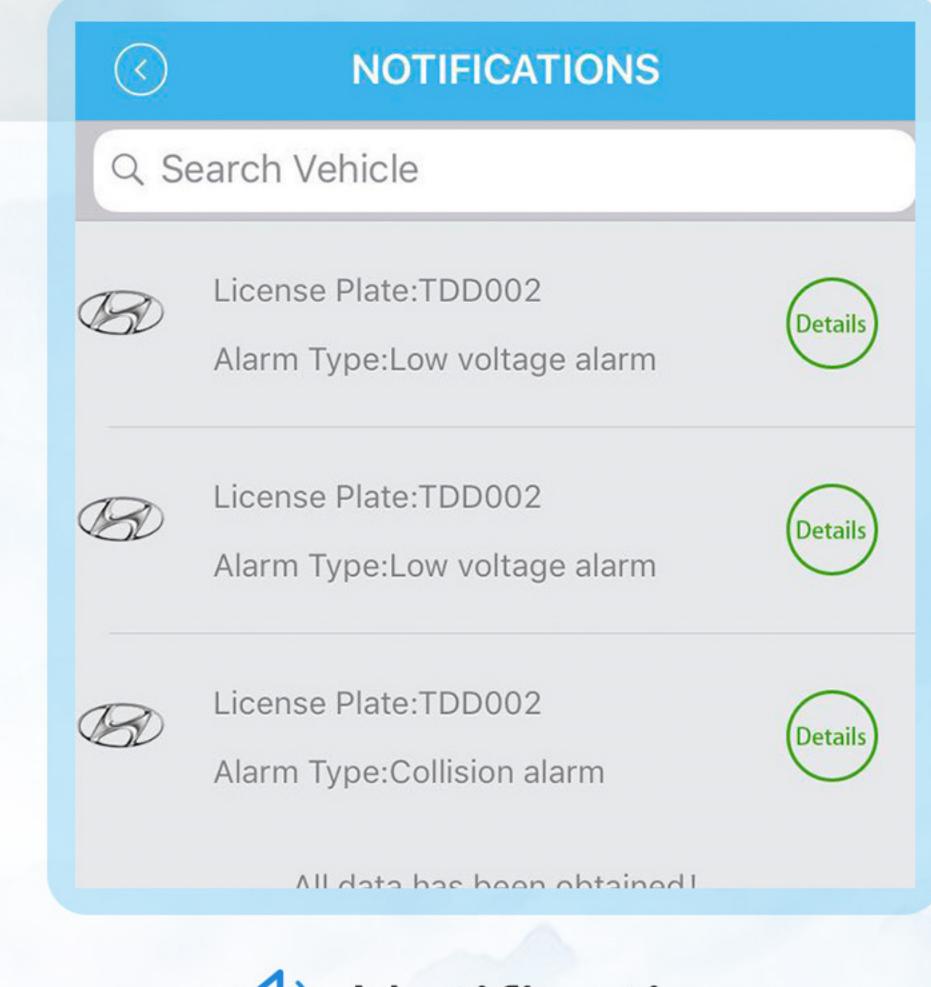

Search Vehicle

Designated vehicle search, specific location, driving personnel, driving conditions, vehicle conditions and other driving data.

Geofence

Set up the electronic fence, monitor the driving area of the convoy and trigger the alarm timely.

Notifications

All vehicles in the convoy are prompted by abnormal vehicle, trouble repair and insurance annual inspection.
